
LFC-HYBRID

THE EASIEST WAY TO CHANGE FILTER CLOTHS

FOR CLASSIC FILTER ELEMENTS

QUICK AND EASY INSTALLATION

LFC-HYBRID

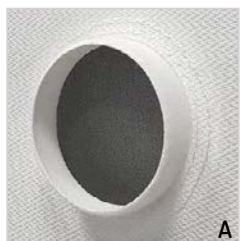

The LFC-Hybrid is the further development of the LENSER Formed Composite (LFC) to easily and quickly fit classic, non-sealed filter plates with a perfectly fitting filter cloth. Like the LFC, the LFC-Hybrid also has an interlocking plug-in neck made of needle felt. This is sewn to a mono, mono/multi or multi filament. Cumbersome assembly is thus a thing of the past, even with classic filter elements.

FEATURES

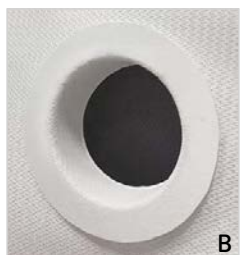

- + Plug-in neck consists of two interlocking parts (female part/ male part)
- + Available as single and overhang filter cloth
- + Classic cloth fastening by eyelets and cable ties or with Velcro fastener
- + Available as mono, mono/multi or multi filament

BENEFITS

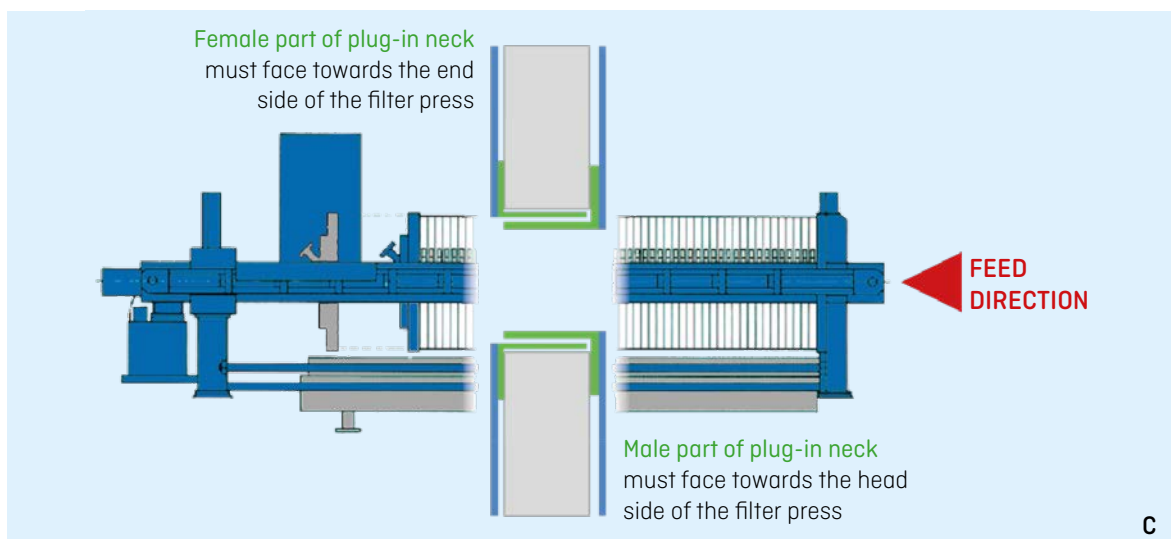

- + Fast and effortless assembly
- + Very short downtimes
- + Easy to retrofit
- + Cloth exchange without removing the filter plate
