
LENSER KF CGR

CHAMBER FILTER ELEMENT – STANDARD, SEALED

FOR FILTER CHAMBERS THAT MUST BE
ABSOLUTELY DRIP-TIGHT

EQUIPPED WITH CLOTH TENSIONING GROOVE
AND O-RING SEALING

LENSER KF CGR

LENSER KF CGR are used when the filter chambers must be absolutely drip-tight.

Depending on the resistance requirements, LENSER offers a variety of sealing materials such as EPDM, silicone, NBR and FKM. For the food and pharmaceutical sector, we use FDA or EU-compliant seals, among others.

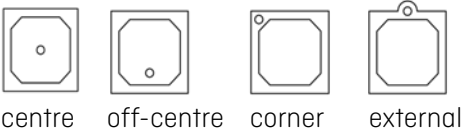

FEATURES

- +** For filter chambers that must be absolutely drip-tight
- +** Different sealing materials available according to requirements
- +** Compatible with critical chemical conditions through the use of additives

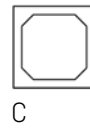

BENEFITS

- +** Available in PVDF for chemically harsh conditions
- +** FDA-compliant, antistatic or ATEX-compliant on request
- +** Equipped with cloth clamping groove (Ω -type or U-type) and O-ring sealing

Feed port position
